CASE MANAGEMENT

CPIMS provides case management services for people who have suffered a catastrophic injury. With over 10 years' experience providing services to clients with complex care needs specialising in acquired brain injury and spinal cord injuries. Case management input is outcome based through person centred goal planning to ensure that our clients rehabilitation needs are fully met. Our case managers utilise the latest evidence based interventions to provide 'individual care for individual people.'

OUR SERVICES:

- Cerebral Palsy
- Acquired Brain Injury
- Spinal Cord Injury
- Amputees
- Complex Care Needs
- Catastrophic (Polytrauma)
- Vocational rehabilitation
- Costed case management reports

EXPERT WITNESS

CPIMS provides expert witness and medico-legal services throughout the UK. We provide expert witness reports instructed on behalf of the Claimant, Defendant or on a joint instruction basis. We have over 10 years' experience in completing objective and independent, high quality quantum needs reports and causation/breach of duty reports in nursing care. Our team of highly experienced healthcare professionals are able to provide reports in the following specialisms:

OUR EXPERTISE:

- General Nursing
- Spinal Cord Injury
- Brain Injury
- Complex Care Needs
- Pressure Area Care
- Falls/Bed Rails
- Practice Nurse/Prescribing
- Nursing/Residential/Community care

REHABILITATION SERVICES

CPIMS use a proactive multidisciplinary approach, underpinned by evidence based and outcome focused goals. We ensure that national standards and care regulations are met, providing clear and structured support. Rehabilitation case management integrates injury and claims management in a clinician-led approach. We work within the context of The Rehabilitation Code 2015 and our experienced case managers coordinate a wide range of medical opinions to formulate a person centred and cohesive rehabilitation programme.

WE COORDINATE:

- Physiotherapy
- Rehabilitation nurses
- Occupational Therapy
- Vocational case management
- Psychotherapy
- Orthotists
- Housing need specialists
- Speech and Language Therapy

IMMEDIATE NEEDS ASSESSMENT

An immediate needs assessment (INA) is prepared following a detailed analysis of the individual's holistic needs, goals and expected outcomes. On receipt of a referral for case management services from the individual's solicitor/receiver/ or insurance company, CPIMS will review any medical and other reports provided by the instructing party and then meet with the individual and family in order to undertake a detailed assessment of needs within 2 weeks. It is our policy to comply with the best practice guidelines under the Rehabilitation Code 2015.

INA'S INCLUDE:

- Current & past medical details
- Social, domestic & occupational details
- Environmental, housing & adaptation needs
- Physical restrictions & impact on activities
- Cognitive & behavioural implications
- Case management & rehabilitation needs
- Therapeutic intervention recommendations
- Further specialist assessments
